

Healthy communities for all.

Michigan Vaccination Partners (MVP)

Creating Healthy Communities for All

Kathleen Larson, LLMSW, MPH

Autism Alliance of Michigan (AAoM)

Kristen Milefchik, MSW

Disability Rights Michigan (DRM)

Patti Ramos, MPH, RD

Michigan Developmental Disabilities Institute (MI-DDI)

Objectives

- COVID-19 impact on the disability community
- Access and educational barriers to successful implementation of health services
- Possible solutions and data collection

Questions we aim to answer:

- How has COVID-19 disproportionately affected persons with disabilities?
- What are the primary barriers to successful vaccination?

Who are the MVPs?

3-year funding received through the Michigan Department of Health and Human Services' (MDHHS) COVID-19 Vaccination Supplement 4.

Efforts from this funding aim to ensure greater equity and access to vaccination for people disproportionately impacted by COVID-19.

People with disabilities experience health disparities.

People with disabilities have been disproportionately impacted by COVID-19.

They were six times more likely to die from COVID-19 and experienced reduced access to routine health care and services.

People with disabilities faced negative social impacts due to the pandemic, like unemployment and reduced access to medications, food, and transportation.

There is a lack
of COVID-19
data related to
people with
disabilities.

Data collection is a fundamental pillar of public health.

This information gap can cause initiatives to leave out people with disabilities and perpetuate social injustice.

MVP empowers people in their communities by:

- Creating a consistent vaccination and health clinic experience.
- Dispelling misinformation about vaccinations and other health topics.
- Using current scientific information to direct our initiatives.
- Collaborating with trusted community-based organizations across the state of Michigan.
- Identifying the need for community resources, like food, transportation, and housing.
- Collecting and reporting disability-related data.

MVP Site Criteria

1. All key immunization personnel complete 90-minute online disability training.
2. Site is ADA-compliant.
3. Site is sensory-friendly.
4. Collects disability status using the six Behavioral Risk Factor Surveillance System (BRFSS) questions.
5. Shares a monthly data summary with MVP team for all events and clinics where COVID-19 vaccinations are offered.
6. Markets immunization clinic and events as Michigan Vaccination Partners (MVP) events.

Healthy communities for all.

MVP Collaborations

1. Establishing relationships in the community.
2. Being a Trusted Community Communicator on social media.
3. Hosting a health event with a variety of services available.

Establishing relationships in the community

- Start by finding communities in need: low vaccination rates, high disability prevalence, high social vulnerability index areas
- Found well-connected and trusted members of those communities already engaged in community outreach
- Let the community leaders facilitate events to maximize the resources we offer at them

Trusted Community Communicator

- Rampant misinformation on social media regarding COVID-19 (Berg, 2021)
- Currently in an “infodemic” (He et al., 2021)
- Trusted community organizations need to share accurate information on COVID-19
- Developed an accessible social media campaign in plain language for organizations to share on their social media account. Includes:
 - Plain language text content
 - Hashtags
 - Images
 - Alt text for images

Organizations can register to be a Trusted Community Communicator at <https://bit.ly/3Fb9t2F>

MVP Health Event Components

- Wayne Health Mobile Unit
- MVP Disability Training for Healthcare Workers
- Sensory kits or sensory treatment rooms
- Communications

Wayne Health Mobile Unit (WHMU)

- Services offered free of charge:
 - COVID-19 vaccine (subject to availability)
 - Pfizer, Moderna, Johnson and Johnson
 - COVID-19 PCR testing
 - Flu shots
 - Blood work screening for diabetes, cholesterol, kidney function
 - Blood pressure screening
 - Behavioral health services
 - Patient education and assistance to resources
 - HIV screening
- WHMU staff
- New ADA van
- Sensory kit availability/noise cancelling headphones

Data from WHMU MVP Events

- **Number of WHMU MVP Events as of 10/24/2022: 140**
- **WHMU Health Services provided (N=952):**
 - Total Vaccinations: 300 (32%)
 - Majority were boosters: 182/300 (61%)
 - Covid Shots: 224 (75%)
 - Flu Shots: 76 (25%)
 - PCR Tests: 269 (28%)
 - Blood Pressure Screenings: 406 (43%)
 - Blood Work: 276 (29%)
- 557 (59%) completed the social determinants of health (SDOH) questions – 9 people identified as having a disability

MVP Disability Training for Healthcare Workers

- All MVP event staff complete the MVP Disability Training.
- This training prepares staff to serve patients requiring accommodations.
- Take the MVP Disability Training at ddi.wayne.edu/mvp/disability-training
 - 2 CEUs for social workers
 - 1.5 CMEs for physicians, physician assistants, nurses

Sensory Considerations

Sensory Kits

- Stress balls
- Fidget toys
- Goldfish
- Fruit snacks
- Oral chew

Sensory Rooms

- Bean bag chairs
- Foam mats
- Corner covers
- Light filters

Behavioral Health Support

- BCBA's
- STs
- Medical staff
- Compensation

General Recommended Accommodations

- Low light environment
- Minimal smell environment
- Safety considerations
- Preferred item availability

Communications

- Plain language infographics ddi.wayne.edu/covidvaccine

People with Disabilities and COVID-19

COVID-19 is a virus. Some people with COVID-19 feel fine, but some feel bad and others get very sick.

People with disabilities and health problems can get COVID-19 and get sick.

People with diabetes, heart problems, cancer, and obesity can get very sick from COVID-19.

COVID-19 vaccines help keep you from getting COVID-19. They also keep you from getting very sick.

When you get the COVID-19 vaccine, you help yourself and other people from getting very sick.

Protect Yourself, Protect Others

Caretakers often work closely with people with disabilities, who can be at high risk of getting very sick with COVID-19.

Close contact while caring for others increases the risk of getting and spreading COVID-19. This is especially true if individuals you are working with are not able to wear a mask due to health reasons.

Getting the COVID-19 vaccine means that you will protect yourself, your family, and the people you care for.

You may be worried or have questions about the COVID-19 vaccine, and that is okay! Remember that knowledge is power. Gather the facts, and find credible vaccine information.

It can help to hear of others' COVID-19 vaccination experience. Listen to testimonials from Michiganders of how getting the COVID-19 vaccine went for them.

Why are COVID-19 Vaccines Important?

Some people with COVID-19 feel fine, but some feel bad and others get very sick.

COVID-19 vaccines help keep you from getting COVID-19. They also help keep you from getting very sick.

You may be worried about getting the COVID-19 vaccine, and that is okay. Talk with your doctor.

When you get the COVID-19 vaccine, you help keep others from getting COVID-19, too.

When you and everyone around you are healthy and vaccinated, we can get back to normal life faster.

Safety and Effectiveness of COVID-19 Vaccines

Studies show that COVID-19 vaccines are very effective at keeping you from getting COVID-19.

The vaccines are safe. The U.S. vaccine safety system makes sure that all vaccines are as safe as possible.

These vaccines cannot give you the virus itself.

You may have some side effects like headache, chills, or body aches. These are normal signs that your body is building protection.

Right after receiving all vaccine shots, continue to practice social distancing and wear a mask. It takes two weeks for your body to build full protection to COVID-19.

If you have a developmental disability or other health concerns, talk with your doctor about the safety of COVID-19 vaccines and how well they work.

Communications

- Informational MVP event postcard

Healthy communities for all.

It was a pleasure to serve you today!

If you have questions, please use the contacts below:

General Questions

Email: middi@wayne.edu

POSSIBILITIES

Data

- **MI-DDI:**

- WHMU Satisfaction Survey (N = 146, 21% of 707 receiving services, last collected 8/27/2022)
- N = 146 (21% of the 707 people who received services completed the survey)
 - Satisfaction with service: 74% extremely satisfied
 - Did staff make you feel comfortable?: 79% extremely
 - Barriers: 91% no barriers

- **AAoM:**

- Michigan-wide ASD Community Survey
 - Anticipated completion: December 2022
- 1000+ sensory kits made/distributed

- **DRM:**

- DRM Disability Community COVID-19 Vaccine Survey
 - Completed March 2022
 - Received 155 completed survey responses
 - Barriers to vaccination identified for both vaccinated and unvaccinated respondents

Next steps for the future

- Collaborations with local health departments
- Collaborations with behavioral health agencies
 - How can YOU get involved with us?
- 3 years of funding - now what?
 - 2024 plans to continue efforts

Unique Organization Contributions

DRM

Educates providers and individuals with disabilities about the legal rights of individuals to receive equitable healthcare services.

Connects individuals to in-home vaccination services when needed.

MI-DDI

Provides WHMU services for MVP events.

Acts as liaison between MVP and WHMU services.

Works to partner with local health departments across Michigan to make them MVP sites.

Unique Organization Contributions

AAoM

Expands sensory considerations and logistical support for permanent and mobile clinical settings that will continue to provide COVID-19 vaccinations and other health services.

Continues educational campaign regarding vaccination misinformation within the ASD community.

Connects persons and families impacted by ASD to the services they need, both medically related and not.

Collaborate with us!

Take the MVP Disability Training.

- 2 CEUs for social workers
- 1.5 CMEs for physicians, physician assistants, nurses
- ddi.wayne.edu/mvp/disability-training

Register to host a health event.

- bit.ly/3Fb9t2F

Be a trusted community communicator.

- bit.ly/3Fb9t2F

Request a sensory room or sensory kits via AAoM.
